

CAPTURE + ACQUISITION

Energy is captured from the natural environment or acquired from generators or the electric grid.

SOLAR

WIND

FIRE

WATER

GRID

ENGINE

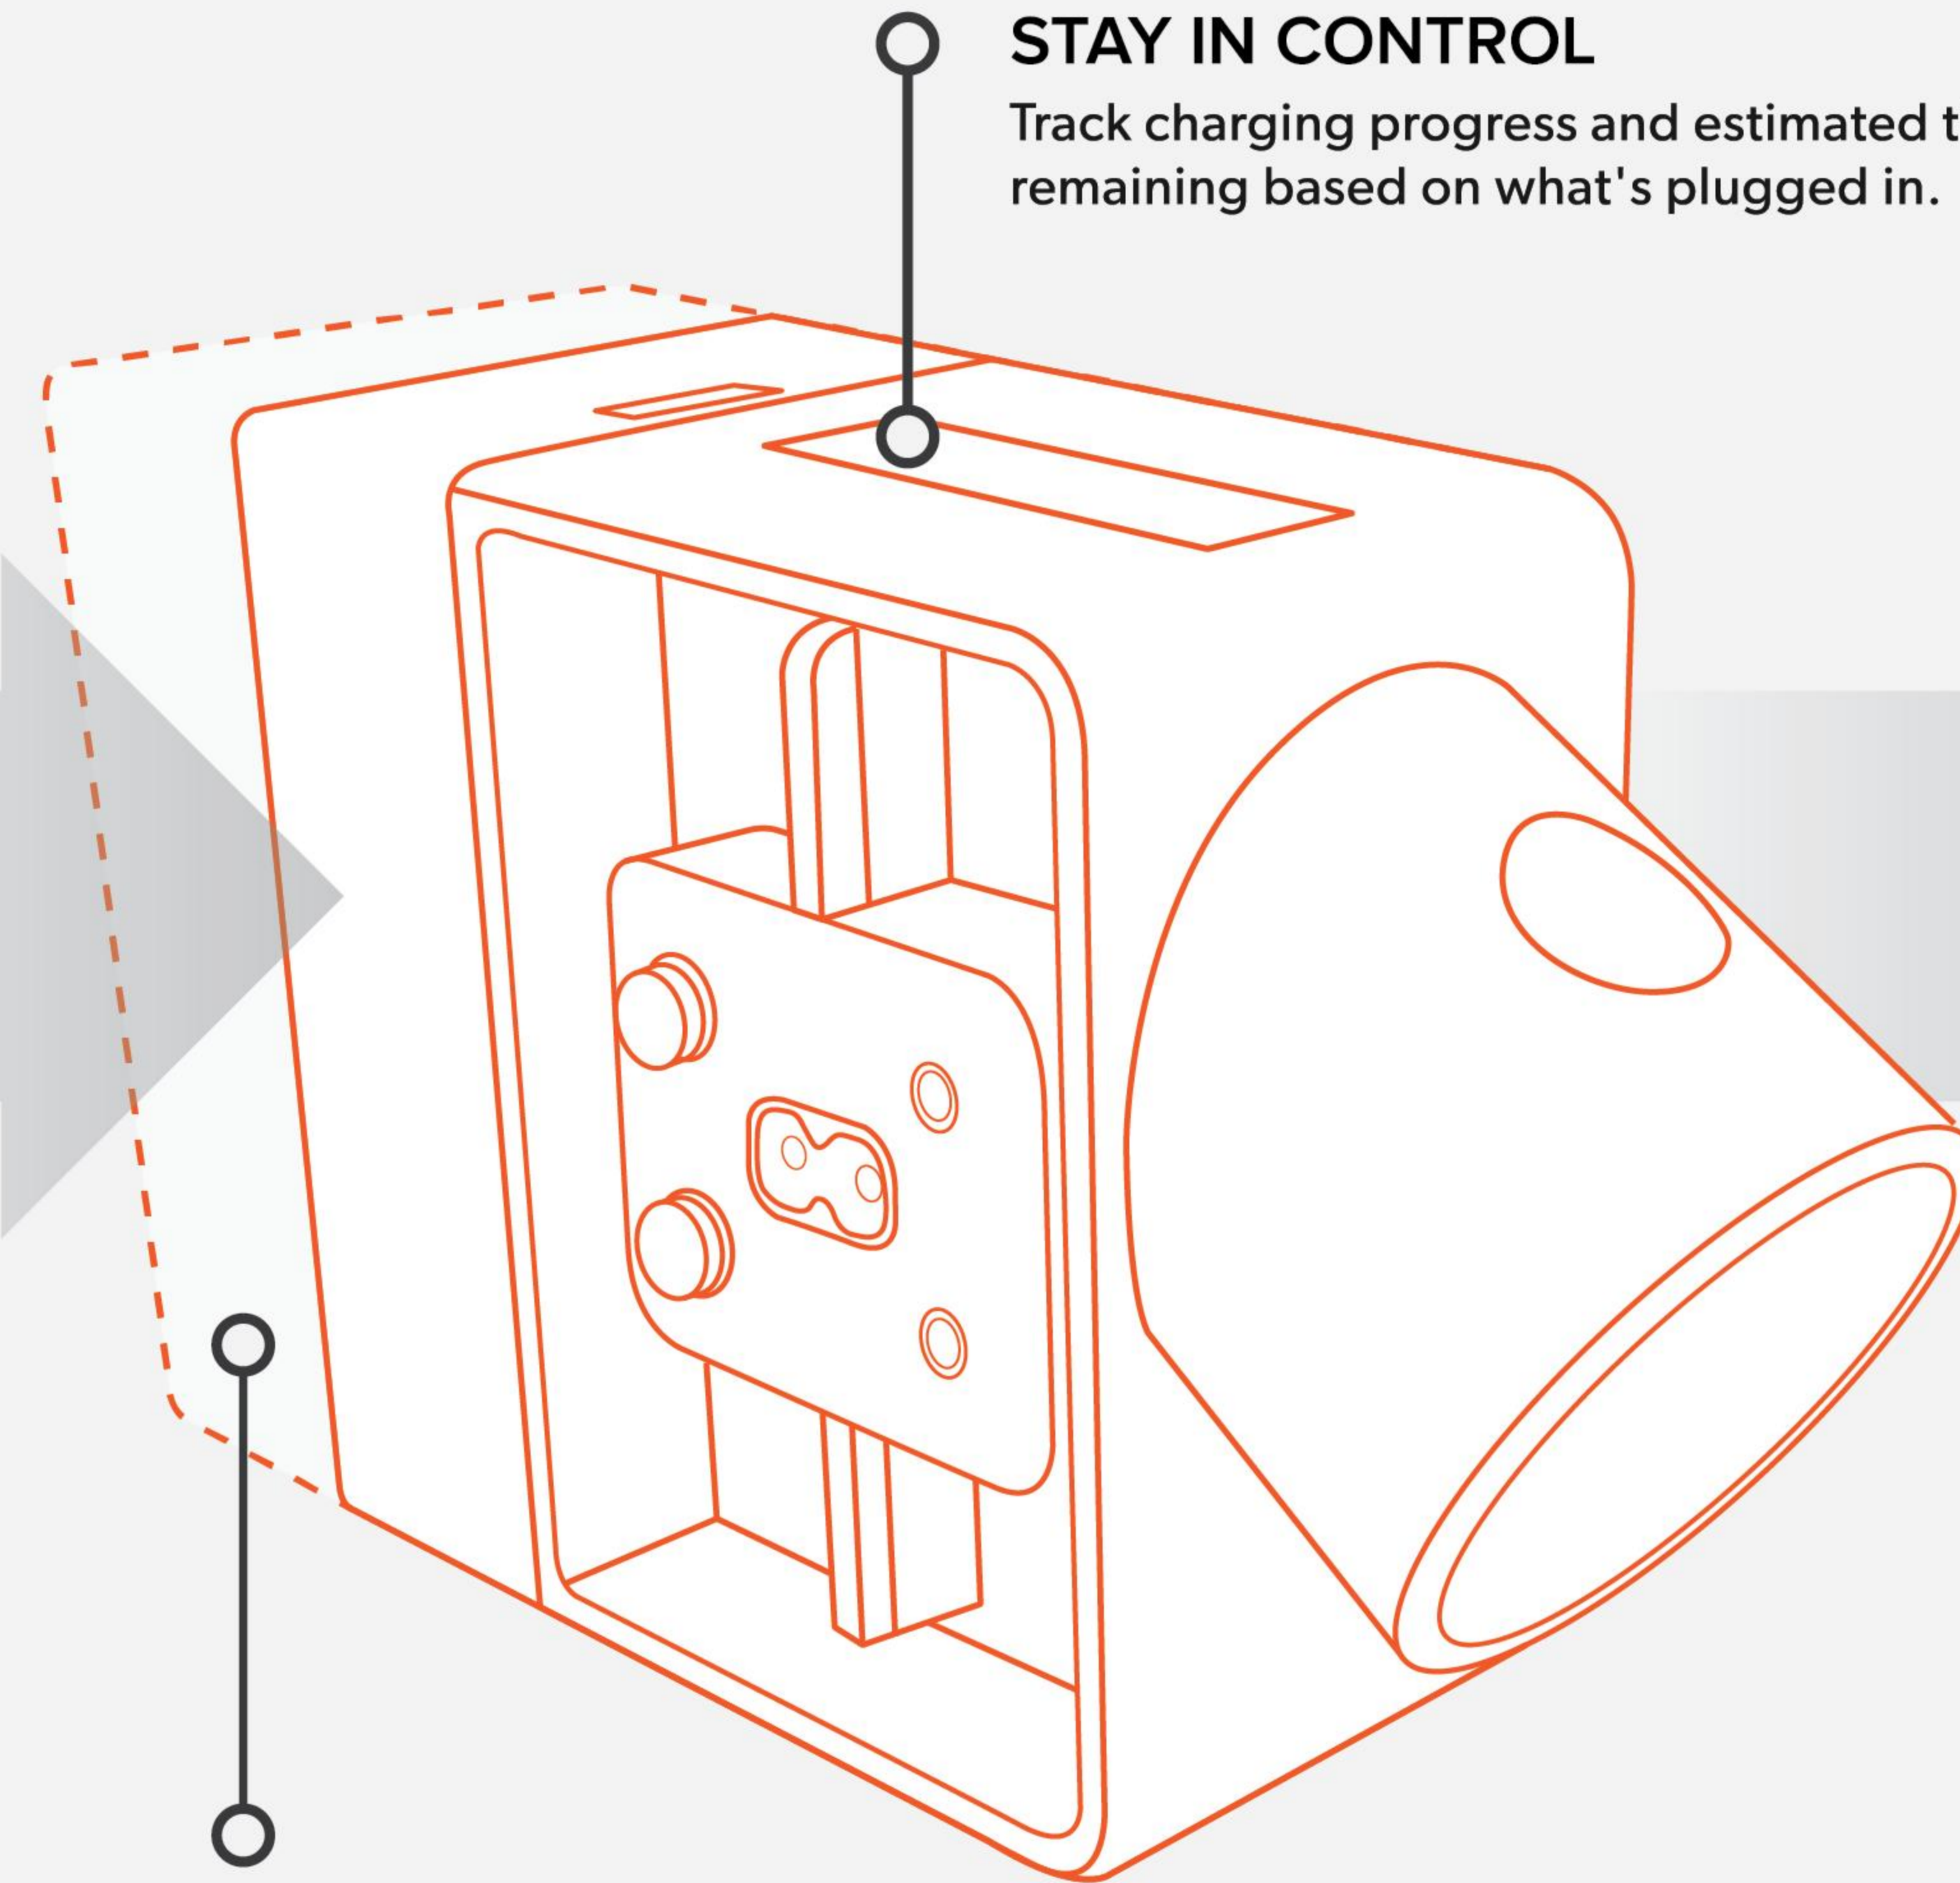

KINETIC

CAR BATTERY

STORAGE + TRANSPORT

Captured energy can be transported into the home or used in mobile situations and stored for later use.

STAY IN CONTROL

Track charging progress and estimated time remaining based on what's plugged in.

ENERGY = INCOME

Stack additional batteries for more energy. Swap, rent, recharge.

USE + IMPACT

Stored energy powers a number of different devices in the home to improve lives of families.
